

Jewish Studies Faculty Seminar

Co-sponsored by the Department of Religion, Program in Global Medieval Studies,
and Rutgers Digital Humanities Initiative

Network Analysis, Cognitive Neuroscience, and Artificial Intelligence: Old Texts and New Methodologies in the Study of Antique Christians and Jews

MICHAL BAR-ASHER SIEGAL

Department of Jewish Thought, Ben Gurion University of the Negev

This seminar will explore the ways in which collaboration between the humanities and the sciences can shed light on ancient rabbinic literature. Network analysis developed in the biological sciences illuminates links between Jewish and Christian texts; cognitive neuroscience offers insights into the relationship between ancient authors and audiences; and artificial intelligence aids in reconstructing lost texts.

Tuesday, February 14 at 10:30 AM

Miller Hall, Room 115 (14 College Ave.)
